Subject: RE: Traffic Control Devices Pooled Fund Program

Bryan,
We have received approval to join the TCD pooled fund program. In case we don't have a chance to connect by phone in the next few days, I want to begin an inquiry on how we might pursue evaluating a symbol for electric vehicle (EV) charging stations. I'm attaching a memo that provides the latest background that we are dealing with here in Oregon. In summary, we are abandoning the idea of evaluating the mouse looking car symbol

and instead would like to pursue evaluation of an alternative that I am told California has used. It has a silhouette of a car with a battery.

For now, I will be the technical contact for Oregon's membership in the TCD pooled fund program. But I may designate an alternative contact when I am absent.
